

Learning Style Inventory

To better understand how you prefer to learn and process information, place a check in the appropriate space after each statement below then use the scoring page to evaluate your responses. Use what you learn from your scores to better develop learning strategies that are best suited to your particular learning styles. This 24-item survey is not timed.

Respond to each statement as honestly as you can.

If you are a **VISUAL learner**, by all means be sure that you look at all study materials. Use charts, filmstrips, notes, videos, and flashcards. Practice visualizing or picturing words and concepts in your head.

If you are an **AUDITORY learner**, you may wish to use tapes. Tape lectures to help fill in gaps in your notes. But do listen and take notes-and review your notes frequently. Sit in the lecture hall or classroom where you can hear well. After you have read something, summarize it and recite it aloud. Talk to other students about class material.

If you are a **TACTILE learner**, trace words as you are saying them. Facts that must be learned should be written several times. Keep a supply of scratch paper on hand for this purpose. Taking and keeping lecture notes is very important. Make study sheets. Associate class material with real-world things or occurrences. When appropriate, practice role-playing.
